PROFESSIONAL SUMMARY

Motivated B.Tech Computer Science Engineering student with a strong foundation in Frontend Development, Object-Oriented Programming, and Database Management. Completed internships in Cloud Computing and Cyber Security with hands-on experience in AWS and Kali Linux. Skilled in web development, CRUD operations, and problem-solving. Eager to contribute as a Software Developer while continuously learning emerging technologies.

INTERSHIP EXPERIANCE

BITS Techno, Kolhapur | Kali Linux, Network Security

01 Jun 2024 – 31 May 2025

- Successfully completed industrial training in Cyber Security and Ethical Hacking.
- Gained hands-on experience in network security, vulnerability assessment, and ethical hacking tools using Kali Linux.

Acmegrade, Bengaluru | AWS Lex, AWS Cloud

13 May 2025 – 13 July 2025

- Successfully completed a Cloud Computing internship with practical exposure to AWS services and cloud technologies.
- Developed practical knowledge of AWS Lex and cloud-based solutions by working on real-world cloud computing concepts.

ACADEMIC PROJECTS

Project 1 : Smart Hotel Ordering System

Role : Full-Stack Developer

- Developed a digital hotel ordering system allowing customers to browse menus, place orders, and make payments through QR code/tablet interfaces.
- Designed the responsive frontend and integrated it with PHP and MySQL for order and customer data management.
- Technologies: HTML, CSS, JavaScript, PHP, MySQL

Project 2 : Car Order Chatbot

Role : Cloud & AI Developer

- Developed an AI-powered conversational chatbot using AWS Lex to assist customers in selecting and ordering vehicles.
- Worked with AWS cloud services to build an interactive and automated customer-support solution.
- Technologies: AWS Lex, AWS Cloud

Project 3 : Jaya Urology Hospital – Healthcare Website

Role : Frontend Developer

- Designed and developed a modern, responsive healthcare website with user-friendly navigation and structured service pages.
- Focused on UI design, responsive layouts, and frontend development to provide easy access to hospital information.
- Developed sections covering urology services, treatments, doctors, facilities, and contact information.
- Technologies: HTML, CSS, JavaScript

Project 4 : Virtual Mouse Using OpenCV

Role : Python & Computer Vision Developer

- Developed a gesture-based virtual mouse using Python and OpenCV to control mouse actions through hand movements.
- Implemented real-time hand detection and gesture recognition for cursor movement and clicking.
- Gained practical experience in Python programming, computer vision, and image processing.
- Technologies: Python, OpenCV, Computer Vision

TECHNICAL SKILLS

- | | | |
|--------------------|----------------------|-------------------|
| • Networking | • C++, OOPS concepts | • MySql |
| • Operating System | • JavaScript | • CRUD operations |
| • C Language | • HTML, CSS | • Java, Python |

EDUCATION

B.Tech in Computer Engineering / Computer Science & Engineering

Dr. D. Y. Patil University / ATU, Talsande, Kolhapur
2024 – Present | CGPA: 7.8/10
Currently pursuing – 3rd Year

Diploma in Computer Engineering

Dr. D. Y. Patil Polytechnic, Kasba Bawada, Kolhapur
Grade – 82.24%

Secondary School (CBSE – Class X)

Sanjeevan Public School, Panhala, Kolhapur, Maharashtra
Grade – 76.33%

LANGUAGES
